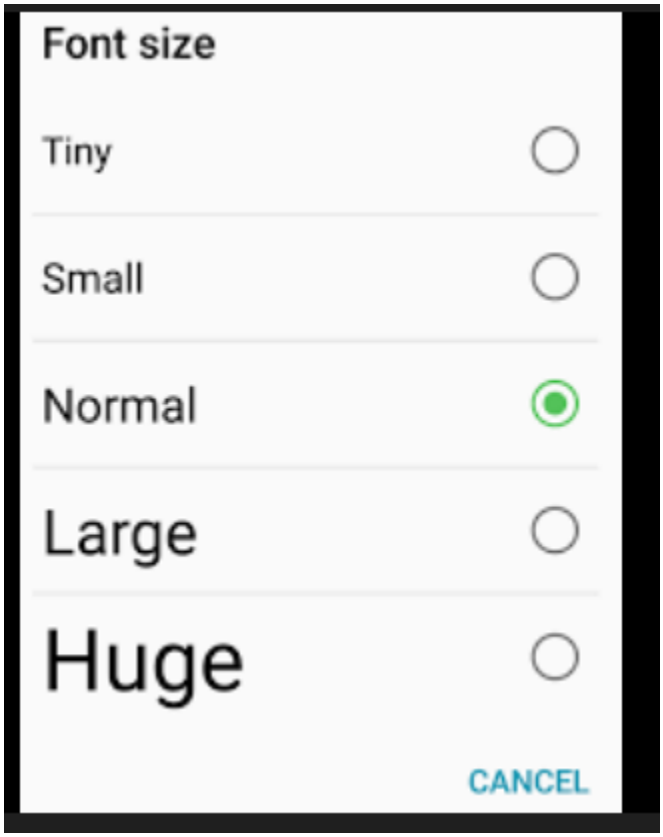
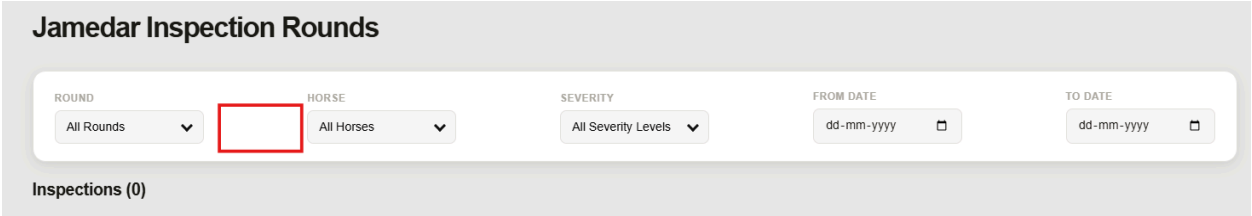
FRIDAY 13/3/2026 - 7PM
FINAL MEETING

1. Increase the size for everything in mobile layout particularly. Most of the employees are in their 50's. The side bar contents are small in the mobile. A settings section in the profile with text size functionality. **Only three are enough, image is for reference, don't use the same ui.**



2. In the inspection rounds add a new dropdown called area. Make necessary changes in the sheet too, so that the area will also be seen

in the sheet data.



3. Add bar graphs and pie charts for inventory dashboards along with the numbers. Refer to the image or ai cavalli admin dashboard.

4. Add new horse - add horse passport number, make it optional and make necessary changes in the backend too.

Add New Horse

Add Photo (optional)

Horse Name *

Shadow (letters and spaces only)

Gender *

Stallion (Male)

Date of Birth

dd-mm-yyyy

Breed

Thoroughbred

Color

Black

Height (hands)

16.2

Unique Stable Number (Optional)

(ST-09)

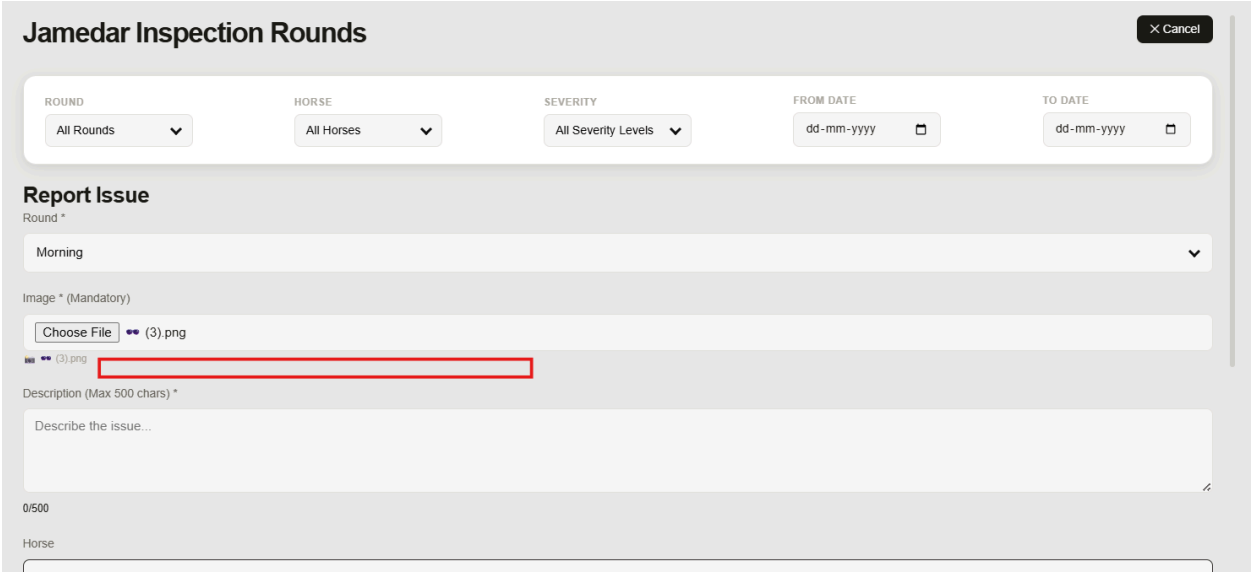
Assign to Manager

-- No Assignment --

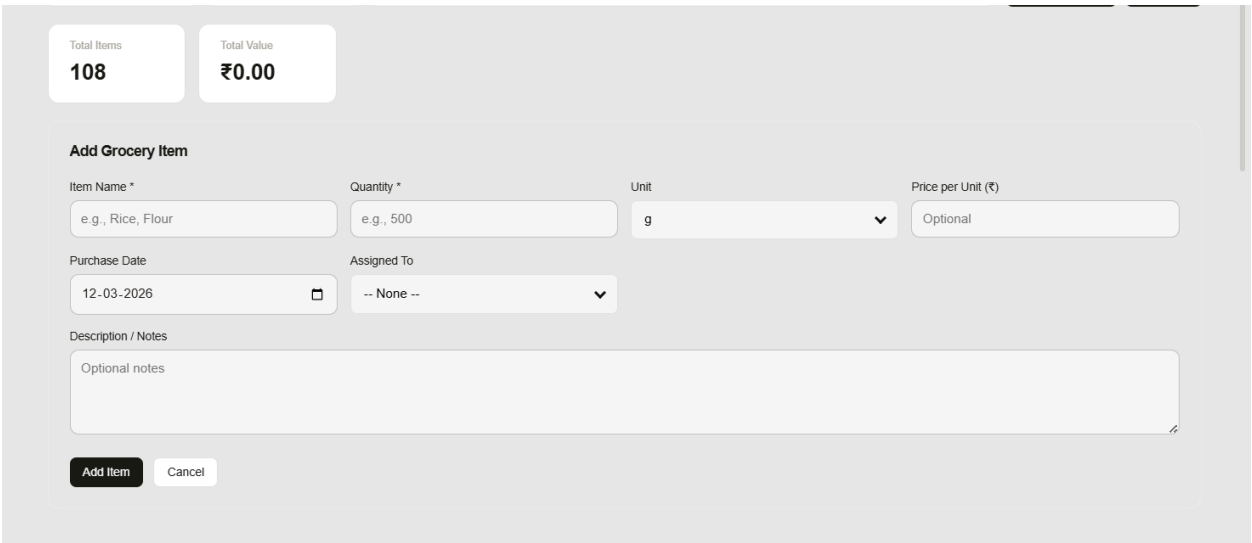
Cancel

Add Horse

5. for inspection rounds add the ability to add multiple images.



6. drop down and input field for grocery inventory, with expiry date optional. We already have the input field, we just need to add the dropdown with the existing data and expiry date date field.

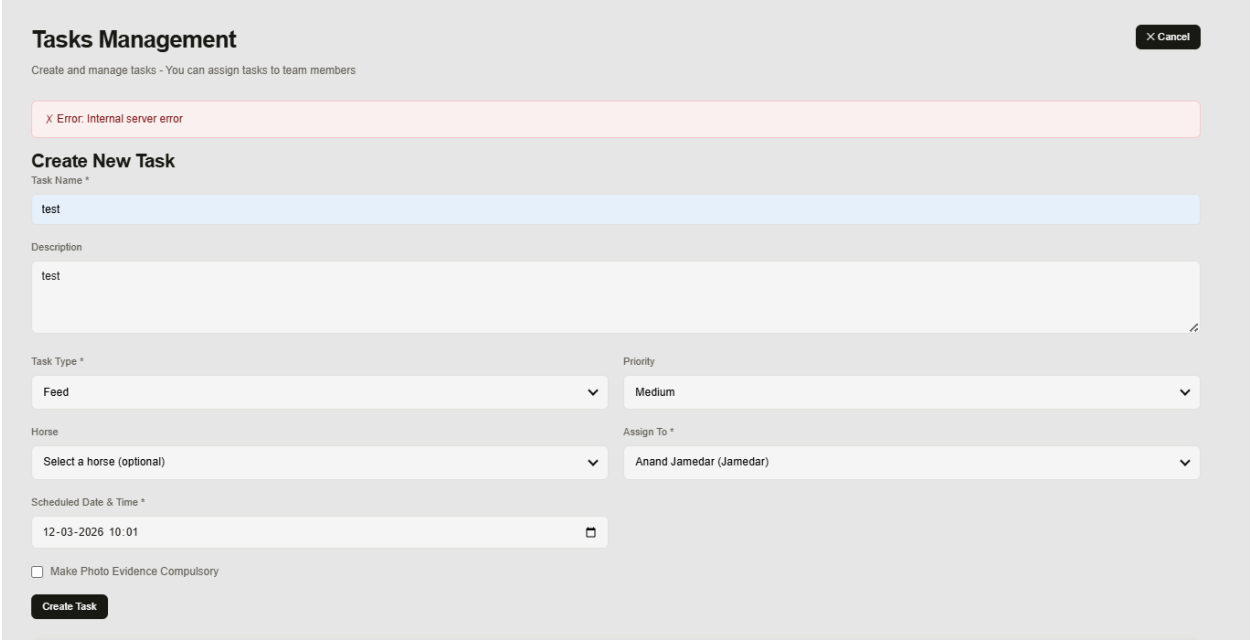


7. add a download option for every tab, to download fines, to download gate register **everything.**

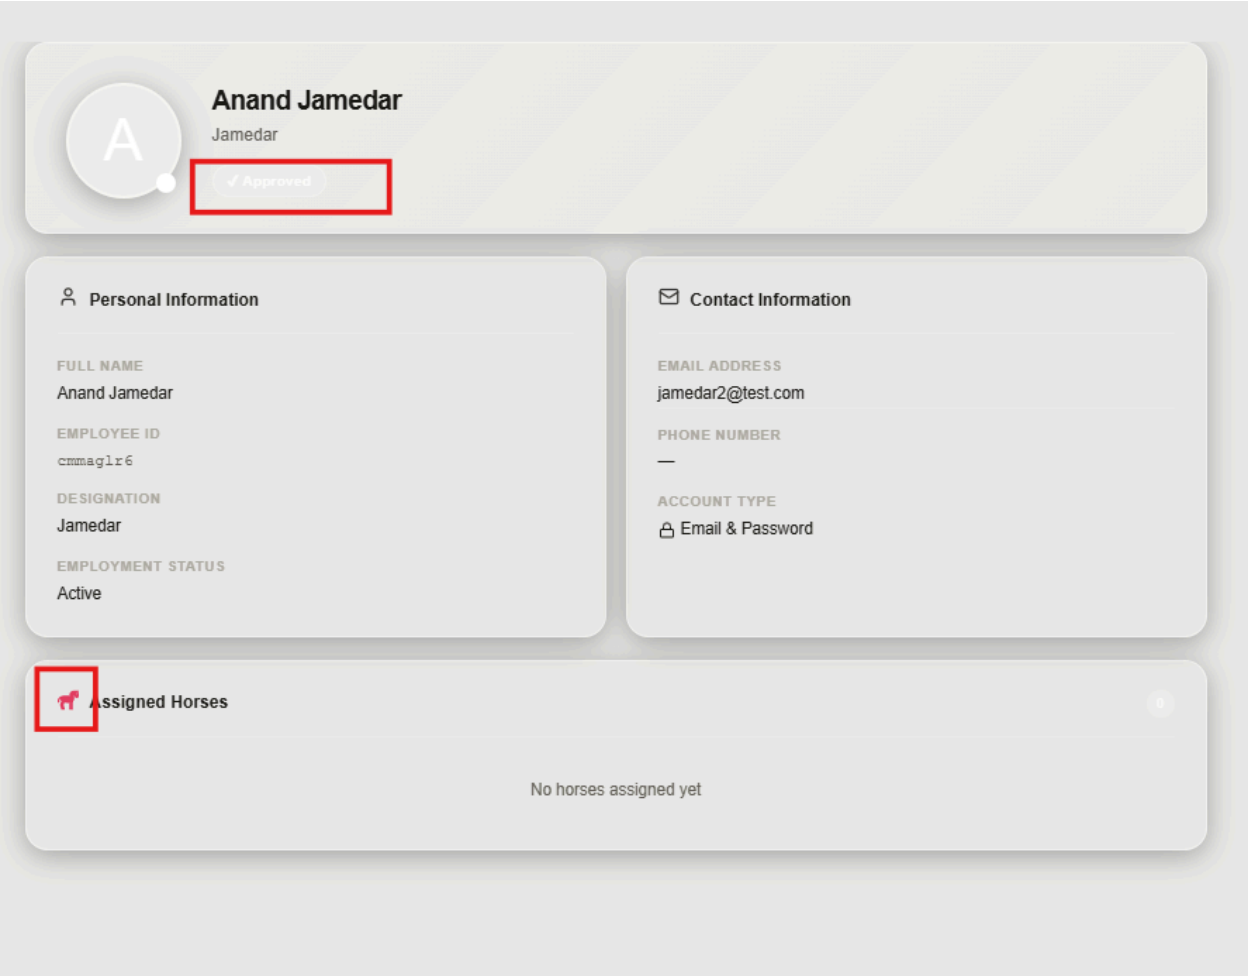
8. Also mention the downloadable assets in the reports tab. We have 19 tabs, some of them may repeat but we want access to download everything. **LITERALLY EVERYTHING**

9. For all inventories add a threshold field and notify button only for the admins. They enter the value for threshold and if the value goes below it then, admin will be notified.

10. Trying to create a task for myself from the jamedhar account (anand) getting an internal error. Everyone can create tasks if the admin allows them from the permissions tab.



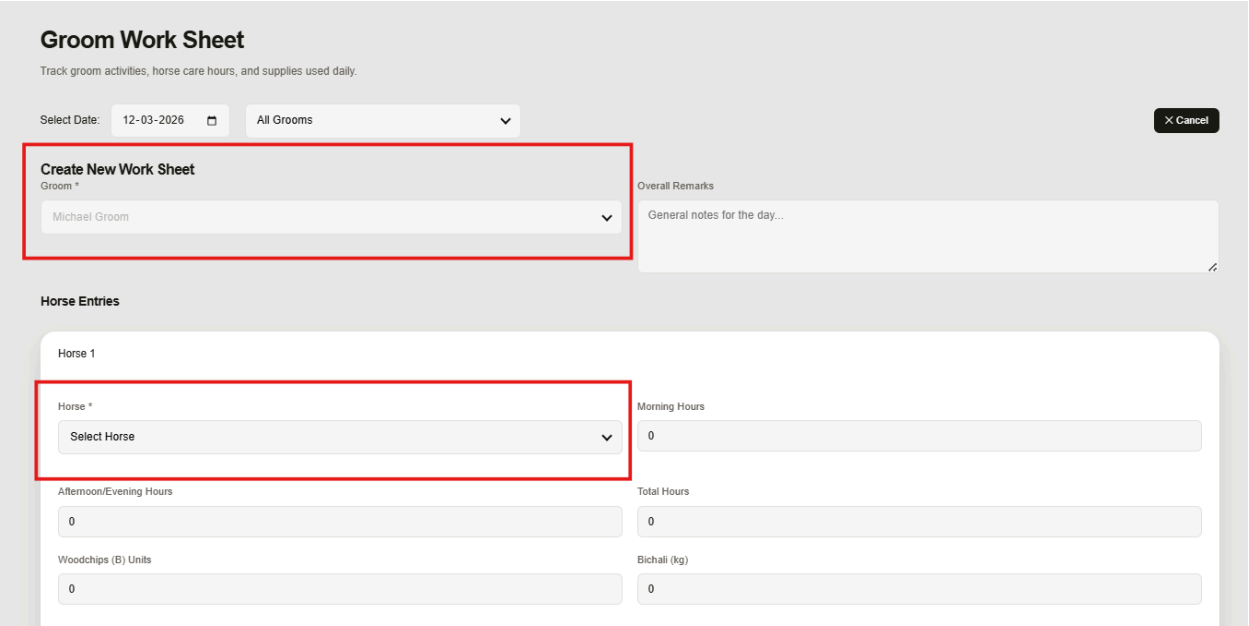
11. Text is small, and approved should be in green, not visible. Replace the bottom emoji with the icon,



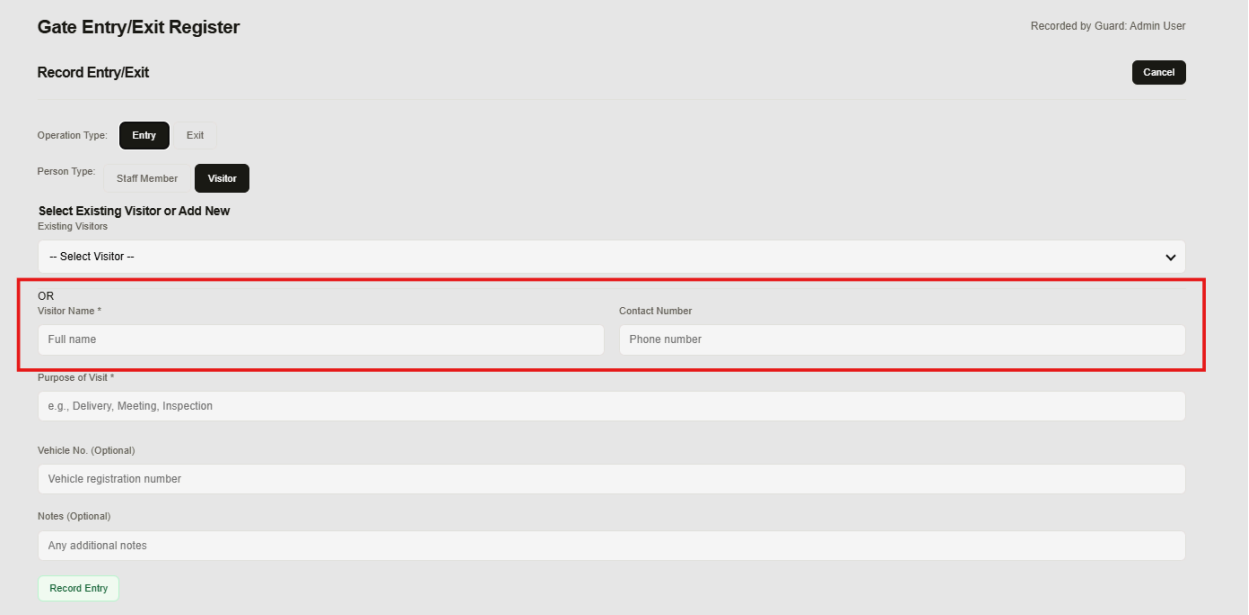
12. Add a work record for everyone related to the office, instructors, riders, riding boys and jamedhars.
Office include executive roles and account roles.

WORK RECORD IS SAME AS GROOM WORKSHEET, JUST THE NAME IS CHANGED.

13. In Groom Work Sheet make the horse and groom optional,



14. Visitor name is optional and contact number is mandatory, if phone number is not given, **take input as all 9999999999 (ten 9's) for multiple visitors.**



15. medicine logs issue, when i click on the medicine logs from other portals, it is showing blank. Fix it

16. ferrier : the person who cleans the horse shoe, nail and foot. The process is called shoeing.

    Shoeing has 3 weeks expiry date(which is 21 days) after every 21 days the ferrier needs to do the shoeing for that particular horse.

    In a single day he can't do shoeing for all the horses. So need fields for that,

1. Horse dropdown to select the horses which got their shoeing
2. Ferrier dropdown to select the ferrier.
3. Timestamp
4. Next due.
5. A tab called completed horses, when the user clicks on it should show the horse name, when is the next due, and who has done the shoeing previously.
6. A tab called pending horses, shows the pending horses.

A notification too, we will be using resend api for this. Notification that u have pending horse, finish the task in the mean time blah blah. And a 24HR snooze button.

17.
