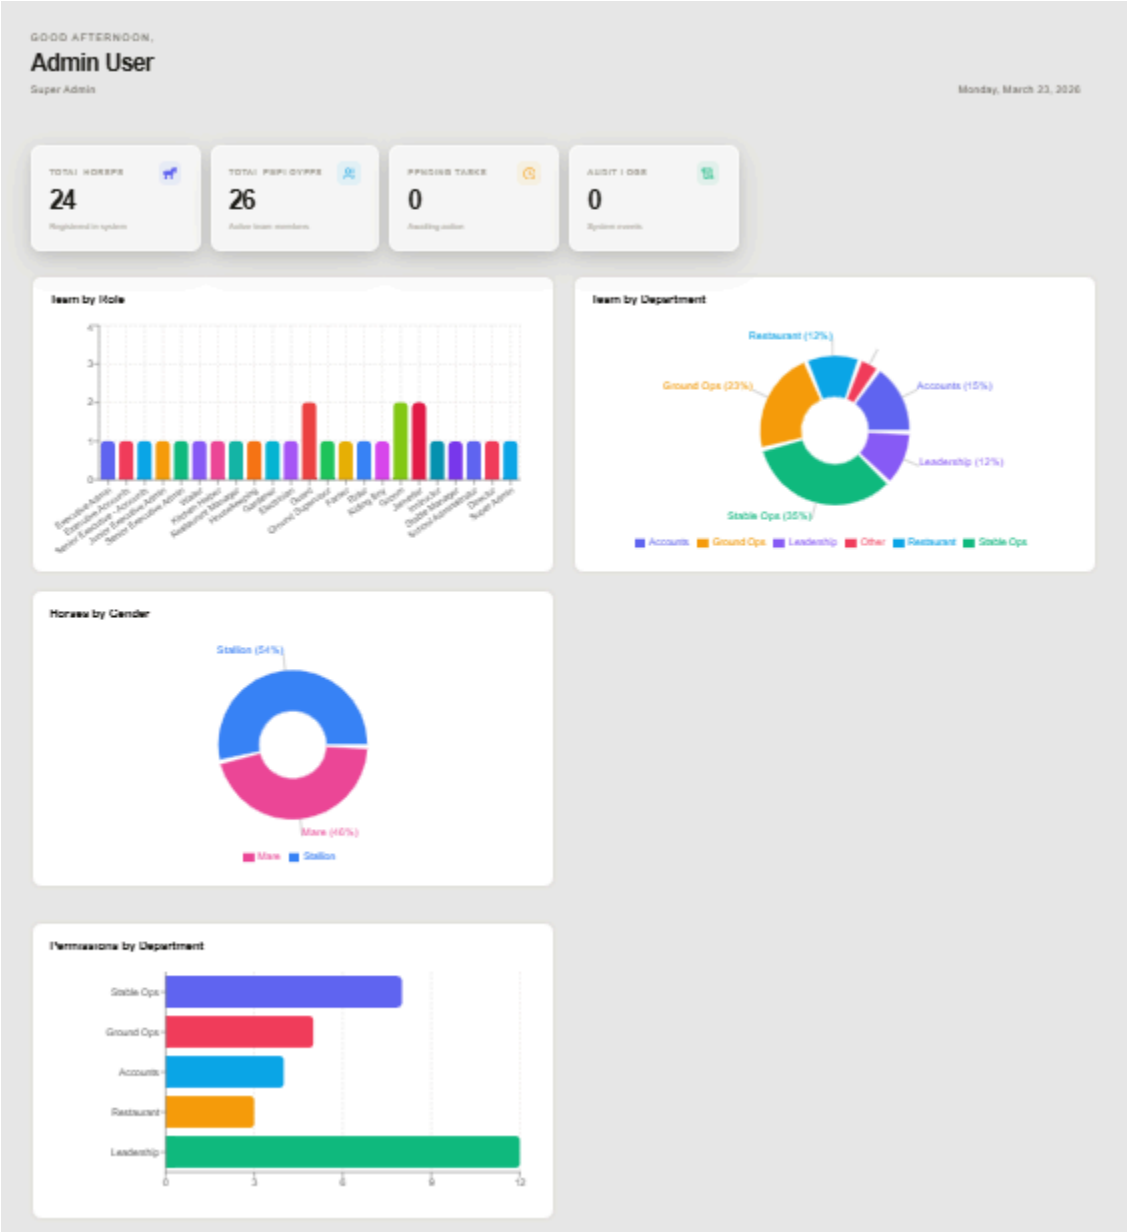
1. Dashboard



📊 Dashboard – Extracted Data

🧾 Header Section

- Greeting: **Good Afternoon**
- User: **Admin User**
- Role: **Super Admin**
- Date: **Monday, March 23, 2026**

📈 KPI Cards

1. **Total Horses**
    - Value: **24**
    - Note: Registered in system
2. **Total Staff / Users (Active)**
    - Value: **26**
    - Note: Active team members
3. **Pending Tasks**
    - Value: **0**
    - Note: Awaiting action
4. **Audit Logs / Issues**
    - Value: **0**
    - Note: System records

📊 Charts & Visual Sections

1. Items by Role (Bar Chart)

- Type: **Vertical Bar Chart**
- Represents: Distribution of items/tasks across roles
- Multiple colored bars per role
- Roles appear like:
    - Admin
    - Groom
    - Stable Staff
    - Ground Ops
    - Leadership
    - etc.

---

2. Items by Department (Donut Chart)

- Type: **Donut Chart**
- Departments:
    - Accounts (~16%)
    - Ground Ops (~22%)
    - Leadership (~12%)
    - Restaurant (~12%)
    - Stable Ops (~15%)
    - Others (~remaining)

---

3. Horses by Gender (Donut Chart)

- Type: **Donut Chart**
- Distribution:
    - Male (~46%)
    - Stallion (~54%)

---

4. Transactions by Department (Horizontal Bar Chart)

- Type: **Horizontal Bar Chart**
- Departments:
    - Stable Ops (highest)
    - Ground Ops
    - Accounts
    - Restaurant
    - Leadership

🎨 UI / Layout Observations

- Card-based layout with soft shadows
- Light theme (white/grey background)
- Rounded components
- Consistent spacing grid
- Charts grouped in sections

🧩 Components Present in This Screen

- Header (User + Date)
- KPI Cards
- Bar Chart
- Donut Charts (2)
- Horizontal Bar Chart
- Section Containers / Cards

🐎 Horses Module – Extracted Data

🧾 Page Header

- Title: **Horses**

- Subtitle: *You can add new horses to the system*
- Primary Action: **Add New Horse (Button)**
- Secondary Action: **Export (Button)**

🔍 Search & Controls

- Search Bar:
  - Placeholder: *Search by name, stable number, breed, color, gender…*

📊 Horses Table

Columns:

1. **Horse Name**
2. **Passport No.**
3. **Stable Number**
4. **Gender**
5. **Breed**
6. **Color**
7. **Assigned Manager**
8. **Status**

Sample Data Pattern:

- Names: Alia Strada, Cadillac, Caesar, Claudia, DejaVu, etc.
- Stable Numbers: ST-1, ST-12, ST-34, etc.
- Gender Tags:
  - Stallion (blue badge)
  - Mare (pink badge)
- Breed: Thoroughbred (consistent)
- Colors: Bay, Chestnut, Grey, Black
- Manager: *Emma Manager (Stable Manager)*
- Status: Active

Table Features:

- Avatar initials for each horse
- Colored status badges
- Clean row-based layout
- Pagination:
    - Page selector (1, 2…)
    - Rows per page (15)
    - Total count (~24 items)

➕ Add New Horse (Modal)

Modal Header:

- Title: **Add New Horse**
- Close (X button)

🖼️ Image Upload

- Add Photo (optional)

📝 Form Fields

Required Fields:

1. **Horse Name**
    - Validation: letters and spaces only
2. **Gender**
    - Dropdown (e.g., Stallion, Mare)

Optional / Additional Fields:

3. **Date of Birth**
    - Date picker (dd-mm-yyyy)
4. **Breed**
    - Example: Thoroughbred
5. **Color**
    - Example: Black
6. **Height (hands)**

    - Numeric input (e.g., 16.2)
7. **Unique Stable Number**
    - Format: (ST-09)
8. **Horse Passport Number**
    - Format hint:
        - Alphanumeric
        - Hyphens & slashes allowed
        - Example: GB-2021-001234
9. **Assign to Manager**
    - Dropdown
    - Default: No Assignment

🎯 Actions

- Cancel Button
- Add Horse (Primary CTA)

🧩 Components Used in This Module

- Header Section
- Search Bar
- Data Table
- Pagination Controls
- Status Tags / Badges
- Modal Popup
- Form Inputs
- Dropdowns
- Date Picker
- File Upload
- Buttons

⚡ Observations (UX Level)

- Very clean SaaS-style layout
- Consistent tagging (gender badges)
- Strong data structure (good for scaling)
- Modal keeps workflow fast (no page redirect)

👥 Team Members Module – Extracted Data

🧾 Page Header

- Title: **Team Members**
- Subtitle: *You can add new employees to the system*
- Primary Action: **Add New Employee (Button)**
- Secondary Action: **Export (Excel Button)**

🔍 Search & Controls

- Search Bar:
  - Placeholder: *Search by name, email, or role…*

📊 Employees Table

Columns:

1. **Name**
2. **Email**
3. **Role**
4. **Supervisor**
5. **Status**
6. **Contact**
7. **Actions**

Sample Data Pattern:

- Names: Admin User, Alex Rider, Anand Jamedar, etc.
- Emails: admin@test.com, rider@test.com, etc.
- Roles (color-coded badges):
  - Super Admin
  - Rider
  - Jamedar
  - Executive Accounts
  - Guard
  - Director
  - Stable Manager
  - Instructor
  - Housekeeping
  - Groom
  - Farrier
  - Ground Supervisor
  - Gardener
  - Senior Executive Admin
- Supervisor: Mostly empty (`-`)
- Status:
  - Approved (green badge)

- Contact:
    - Phone numbers (e.g., 555-0001)

Table Features:

- Avatar initials for each employee
- Role-based colored tags
- Status badges
- Pagination:
    - Page selector (1, 2…)
    - Rows per page (15)
    - Total count (~26 items)

➕ Add New Employee (Modal)

Modal Header:

- Title: **Add New Employee**
- Close (X button)

🖼️ Image Upload

- Add Photo (optional)

📝 Form Fields

Required Fields:

1. **Full Name**
    - Validation: letters and spaces only
2. **Email Address**
    - Standard email format validation
3. **Designation / Role**
    - Dropdown (e.g., Groom, Guard, Manager)

Optional Fields:

4. **Supervisor**
    - Dropdown (Select Supervisor)
5. **Phone Number**
    - Format: 10-digit number

🎯 Actions

- Cancel Button
- Add Employee (Primary CTA)

🧩 Components Used in This Module

- Header Section
- Search Bar
- Data Table
- Pagination
- Role Tags / Badges
- Status Indicators
- Modal Popup
- Form Inputs
- Dropdowns
- File Upload
- Buttons

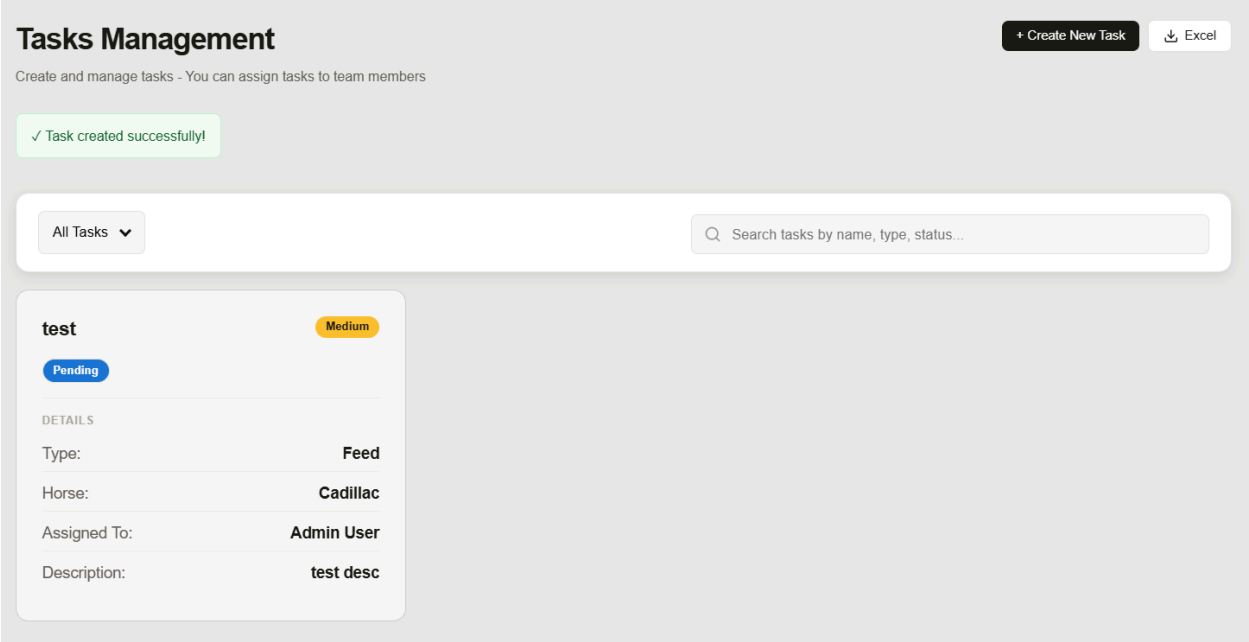
⚡ Observations (UX + System)

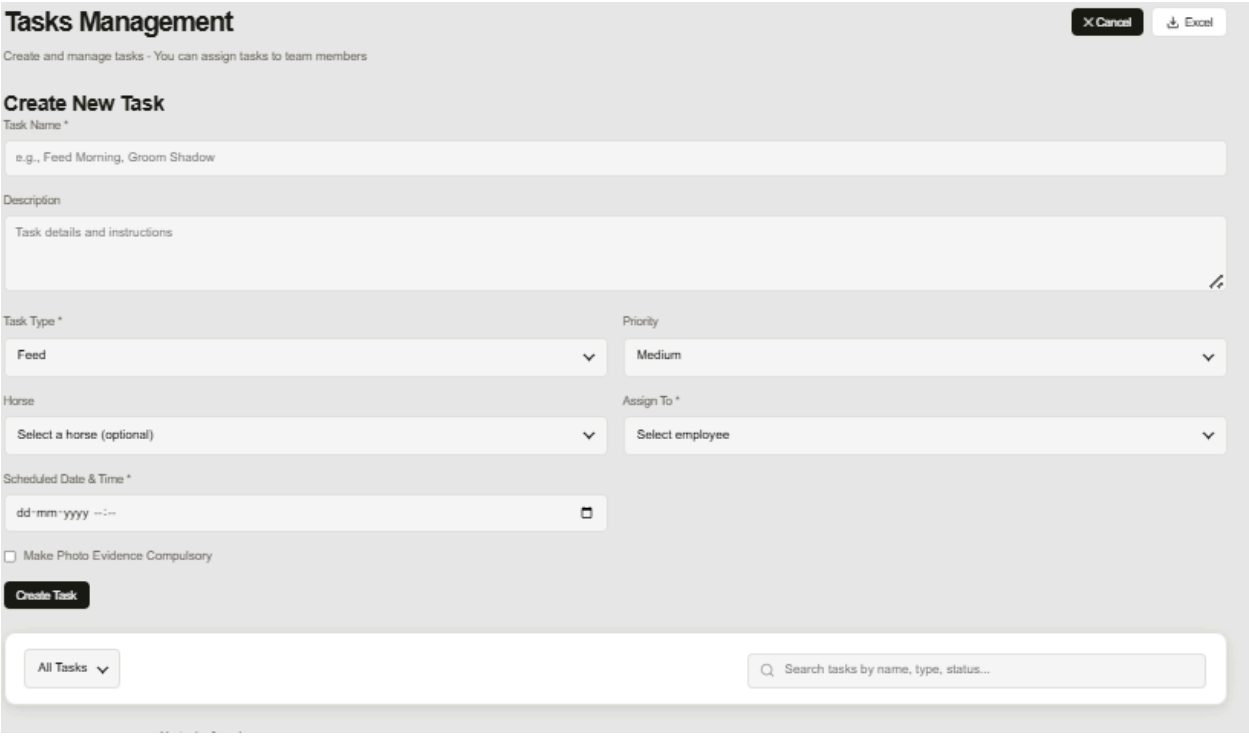
- Strong role-based system (good for permissions later)
- Clean separation of roles vs supervisors
- Ready for RBAC (Role-Based Access Control)
- Consistent UI with Horses module (good design system)

-

3.1 tasks

3.1 tasks





🧩 Page: Tasks Management

1. Header Section

Components:

- Page Title: `Tasks Management`
- Subtitle/Description: `Create and manage tasks - You can assign tasks to team members`
- Action Buttons:
  - `+ Create New Task`
  - `Excel` (export/download)

---

2. Success Notification

Component:

- Alert / Toast Message
  - Text: `Task created successfully!`
  - Type: Success (green)

---

3. Create New Task Form

📝 Fields

Field Label	Type	Required	Placeholder / Default	Notes
Task Name	Text Input	✅	`e.g., Feed Morning, Groom Shadow`	Main title
Description	Textarea	❌	`Task details and instructions`	Multi-line

Task Type	Dropdown	✅	Default: `Feed`	Predefined types
Priority	Dropdown	❌	Default: `Medium`	Likely Low / Medium / High
Horse	Dropdown	❌	`Select a horse (optional)`	Optional relation
Assign To	Dropdown	❌	`Select employee`	User assignment
Scheduled Date & Time	DateTime Picker	✅	`dd-mm-yyyy --:--`	Includes calendar selector
Make Photo Evidence Compulsory	Checkbox	❌	Unchecked	Boolean flag

---

🎛️ Form Actions

- `Create Task` button (primary submit)

---

4. Filters & Search Bar

Components:

- Filter Dropdown:
  - Label: `All Tasks`
  - Likely options: All / Pending / Completed / etc.
- Search Input:
  - Placeholder: `Search tasks by name, type, status...`

    - Icon: Search (🔍)

---

5. Task List / Cards

Each task is displayed as a **card component**.

📦 Task Card Structure

Header:

- Task Name (e.g., `test`)
- Priority Badge (e.g., `Medium`)
- Status Badge (e.g., `Pending`)

Details Section:

- Type: `Feed`
- Horse: `Cadillac`
- Assigned To: `Admin User`
- Description: `test desc`

---

6. Task Attributes (Data Model Insight)

From the UI, each task likely contains:

```
{
  "task_name": "string",
  "description": "string",
  "task_type": "string",
  "priority": "low | medium | high",
  "horse": "string (optional)",
  "assigned_to": "user",
  "scheduled_datetime": "datetime",
```

```
  "photo_evidence_required": "boolean",

  "status": "pending | completed | etc"

}
```

---

7. UI States Identified

- Default (empty form)
- Success state (task created)
- Task list populated
- Filtered view (via dropdown/search)

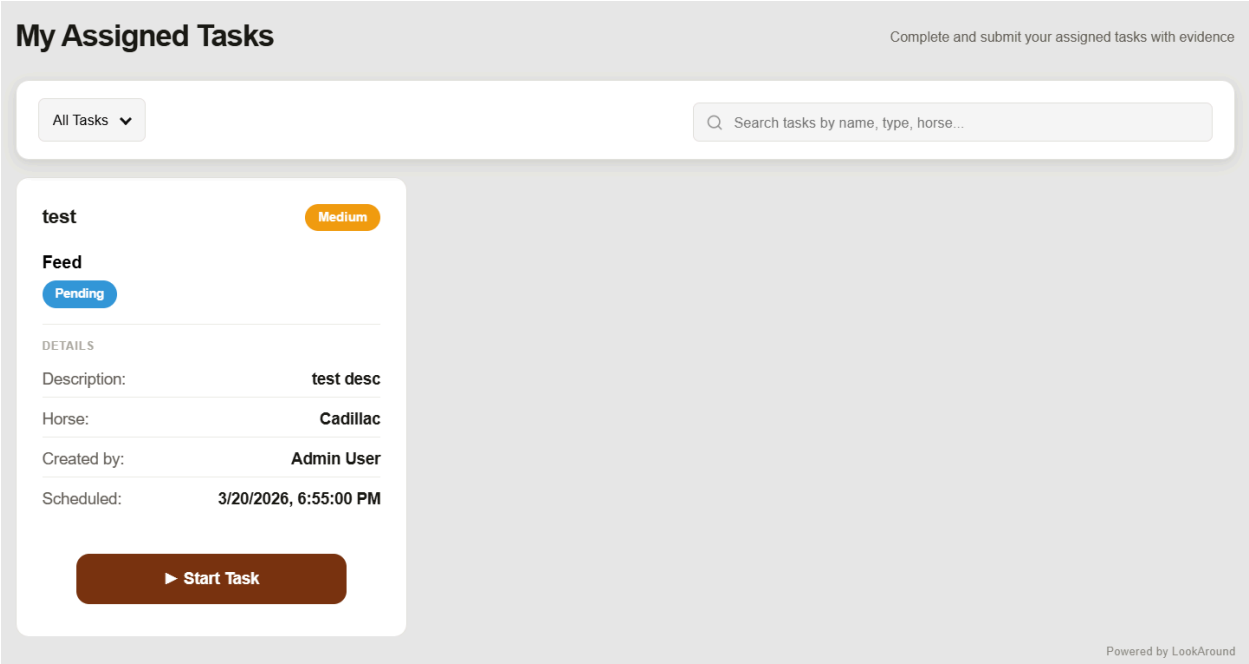
---

8. Reusable Components

- Button (primary / secondary)
- Dropdown (select)
- Input field
- Textarea
- Checkbox
- Badge (status / priority)
- Card (task display)
- Alert (success message)
- Search bar

3.2 My assigned tasks

3.2 My assigned tasks



🧩 Page: My Assigned Tasks

1. Header Section

Components:

- Page Title: `My Assigned Tasks`
- Subtitle: `Complete and submit your assigned tasks with evidence`

---

2. Filters & Search

Components:

- Filter Dropdown:
  - Label: `All Tasks`
  - Purpose: Filter by status (e.g., All / Pending / In Progress / Completed)

- Search Input:
  - Placeholder: `Search tasks by name, type, horse...`
  - Includes search icon

---

3. Task List (Assigned Tasks)

Tasks are displayed as **cards**, similar to admin view but tailored for the assigned user.

📦 Task Card Structure

🔹 Header

- Task Name (e.g., `test`)
- Priority Badge (e.g., `Medium`)

🔹 Task Info

- Task Type (e.g., `Feed`)
- Status Badge (e.g., `Pending`)

🔹 Details Section

Field	Value Example
Description	`test desc`
Horse	`Cadillac`
Created By	`Admin User`

Scheduled	`3/20/2026, 6:55:00 PM`

🔹 **Actions**

- Primary Button: ▶ `Start Task`

---

4. Task States (User Perspective)

- **Pending**
  - Shows "Start Task" button
- **In Progress** *(implied)*
  - Likely changes button to "Submit" / "Complete"
- **Completed** *(implied)*
  - May remove action button or show status only

---

5. Key Differences from Admin View

Feature	Admin (Tasks Management)	Assigned User
Create Task	✅	❌
Assign Task	✅	❌
View All Tasks	✅	❌ (only assigned)
Start/Execute Task	❌	✅

Created By Field	❌	✅
Scheduled Time Visible	Optional	✅ prominent

---

6. Task Data Model (Extended)

```
{
  "task_name": "string",
  "description": "string",
  "task_type": "string",
  "priority": "low | medium | high",
  "horse": "string",
  "created_by": "user",
  "assigned_to": "user",
  "scheduled_datetime": "datetime",
  "status": "pending | in_progress | completed",
  "photo_evidence_required": "boolean"
}
```

---

7. Reusable Components

- Task Card (user variant)
- Status Badge (Pending, etc.)
- Priority Badge
- Button (Start Task)

- Dropdown filter
- Search bar

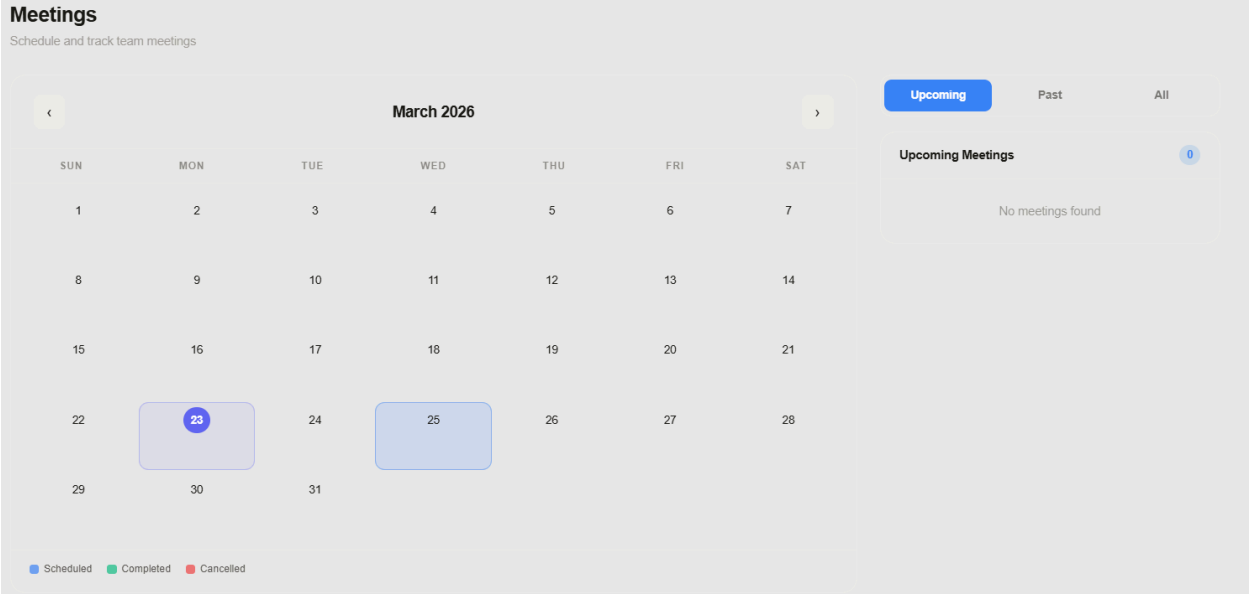
---

8. UX Notes (Useful for Documentation)

- Focus is on **execution**, not management
- Minimal inputs → action-driven UI
- “Start Task” is the primary CTA
- Clear visibility of:
    - Who created the task
    - When it is scheduled
- Designed for quick scanning + action

3.3 Approvals

3.4 Meetings



Page / Section Titles

- Meetings
- Schedule and track team meetings
- March 2026
